

NZFBI FIELD DAY

CHRISTCHURCH

E Squadron (EOD), Southern Troop Display

Understand the response role of E Squadron (Explosive Ordnance Disposal)

E Squadron (EOD) was first established in June 2010, with the mission to provide a permanent domestic **Chemical Biological Radiological Explosive (CBRNE), Explosive Ordnance Disposal (EOD) and Improvised Explosive Device Disposal (IEDD)** response at an Operational Level of Capability (OLOC) at all times to effectively achieve its directed government outputs.

The role of E Squadron (EOD) is to securely and safely dispose of conventional and improvised explosive hazards and commercial munitions and explosives in support of the NZ Police and NZDF, both Domestically and Deployed.

Learning outcomes

- Overview of the domestic role and the overseas operational role
- EOD capabilities—Common Munitions Disposal, IEDD, CBRNE, Civilian Ammunition Inspector, Special Forces Operations
- Awareness of how EOD (E Sqn) can support NZFS outputs at HAZMAT incidents
- Static display and explanation of equipment capability:
 - Detection
 - Specialist Diagnostic Equipment—HAZMAT ID Elite, First Defender, etc
 - X-ray
 - Mitigation
 - Robotics
 - Render safe
 - De-Contamination.
