

NZFBI FIELD DAY

HERETAUNGA

Working Safely with Aircraft

Gain knowledge and experience with working safely with aircraft and loading water and additives for aerial operations

This Field Day will give participants a good level of knowledge of:

- Safe working practices when loading aircraft with water and additives, and
- Hazards associated with aircraft at emergency incidents.

Unit Standards 3288 and 20388

Participants at this Field Day will have the opportunity to do **Unit Standards 3288 (Load Water and Additives for Aerial Operations at Vegetation Fires)** and **20388 (Work Safely with Aircraft at Emergency Incidents)**.

If you wish to do these Unit Standards you must register and indicate your intention to do so by **28 April 2017** to provide sufficient time to complete the pre-course work.

To be eligible to do these Unit Standards you must hold **Unit Standard 3285 (Working Safely at Vegetation Fires)**.

Learning outcomes

- Safe procedures for loading and unloading personnel equipment
- Survival procedures at an aircraft emergency landing
- Working as a crew in setting up a site for aircraft loading/filling operations
- Filling helicopter buckets with water and additives to safe load levels
- Understanding hazards associated with aircraft at emergency incidents.

Terms and Conditions

- There will be a **registration fee for this Field Day—\$40 per participant** (including morning tea, lunch and barbecue)
- This Field Day is **limited to 40 participants**. Because of the limited number of places available, you acknowledge that by registering for this event, you will be liable for the \$40 registration cost.
- Travel and accommodation costs must be met by attendees.
