

## **Waterway Clarifications – A7-A8 (November 2025)**

To ensure consistency for all competitors and to align the stowing of the Hose Reel with standard practice, the following wording will supersede that of Hose Reel in the General Conditions, Bullet Point 1, Page 12 of the Waterway Rules published June 2025.

### **HOSE REEL**

- Hose reel is to be wound up **under pressure** and **the branch drained before being** stored ~~under pressure.~~
- Hose reel valve may remain open throughout the run.
- The hose reel branch will be set to fit in the hose reel branch holder. The competitor will be expected to adjust the nozzle accordingly.
